

**Twenty Years. One Mission.
Your Security.
Dowley Security Systems**

In 2006, Dowley Security Systems made a simple promise to Houston-area businesses: *We'll protect what you've built.*

Two decades later Dowley has secured over \$100 million in security projects across more than 1,000 educational facilities, as well as multiple commercial, state, and local government entities throughout Texas.

Our Approach

At Dowley Security Systems, we don't simply install equipment — we design security ecosystems. Our team works closely with each client to evaluate risk, understand operational challenges, and develop customized solutions that balance security, usability, and budget.

Unified Systems. Simplified Security.

Whether securing a single facility or an entire district-wide enterprise, we provide turnkey solutions from design and engineering through installation, training, and ongoing support.

Along the way, we learned something important: the proper security solution isn't about the fanciest technology. It's about understanding your operations, vulnerabilities, and what keeps you up at night—then building a system around them.

**Video surveillance. Access control. Intrusion detection.
Mass notification. AI-enhanced analytics.**

We design it. We install it. We service it. A security system is only as good as the team behind it. That approach has earned us Security Innovation's Gold Medal Award, a spot on America's Top 100 System Integrators list, and three appearances on the SD&I Fast 50 list.

But what we're most proud of? The team we've built and the relationships with clients who've trusted us year after year. If you're looking for a security partner who shows up, listens, and gets it right, let's talk.

Houston-based. Texas-proud.

Securing Tomorrow, Today
Dowley Security Systems

A Legacy of Service. A Future of Innovation.

For two decades, Dowley Security Systems has delivered advanced, integrated security solutions that protect people, property, and mission-critical operations. Based in Houston, we support organizations across education, critical infrastructure, government, and commercial markets with reliable, future-ready technology.

As an award-winning, full-service security integrator, our team brings deep technical expertise, proven processes, and an unwavering commitment to quality. Every project—large or small—receives the same precision, care, and attention.

Experience Counts

And We Have the Numbers to Prove It

Our Proven Impact

- Multiple security projects across Greater Houston
- Specialized in Education-sector sales (K-12 & Higher Ed)
 - Across 1000+ campuses
- 20,000+ access control doors installed
- 40,000+ IP cameras deployed
- 1,000+ Intrusion & Mass Notification systems deployed

Honored With:

- Security Innovation Gold Medal Award
- Top 100 Systems Integrators in the US
- Fast50 Award (Three times)

Powered by Engineering. Driven by Experience.

Unified Security Solutions

In today's environment, security can no longer operate in silos. Organizations need a fully integrated approach that protects people, property, and operations while simplifying management and reducing long-term costs..

Video Surveillance

Advanced video systems that protect assets, detect threats, and provide real-time situational awareness. Integrated platforms enhance investigations, response, and operational efficiency.

Access Control

Secure, scalable systems that restrict unauthorized entry and protect employees, students, and critical areas. From single facilities to enterprise deployments, we simplify management and compliance.

Security Infrastructure

High-reliability networks and architectures built for modern security systems. We design and implement data-ready, cloud-capable, high-availability infrastructure.

Notification Systems

Instant, reliable emergency communication. Mass notification and alerting systems ensure critical messages reach the right people—fast.

Service & Support

Reliable, proactive support that keeps your security systems operating at peak performance. Our service programs ensure uptime, reduce risk, and protect the long-term health of your investment.

Dowley Security Systems is more than a technology provider—we're a long-term partner committed to reliability, preparedness, and continuity. Our service programs are tailored to your environment, built to reduce operational risk, and guided by experienced engineers who support you through every stage of your system's lifecycle.
