DOWLEY®
SECURITY SYSTEMS

Advanced Technology
To Secure Your Business

As a full service provider, **Dowley** offers a comprehensive portfolio of security solutions.

Video Surveillance

Video Surveillance solutions utilizing digital video cameras, remote access and intelligent analytics provide organizations with the ability to protect their clients, employees and assets as well as reduce operating costs. Additional benefits include enhanced investigative capability, expedited emergency response and improved operational efficiency.

Access Control

Access control solutions determine who, where and when individuals are allowed to enter and exit specific areas within your facility, while also providing the means to manage, monitor and record activity. Access control solutions can be configured to grant access based upon a wide range of specified credentials therefore replacing traditional mechanical locks and keys.

Life Safety Detection

Life safety solutions and intrusion detection systems are critical to the ability to communicate quickly and effectively in the event of an alarm in order to ensure the safety of employees, the public, first responders and assets/property. Understanding event details and providing shortened response times are crucial to limiting/containing effects from these events.

Security Infrastructure

Today's advanced security solutions have matured dramatically and are continually being replaced with Internet Protocol (IP) technology leveraging both premise based and/or cloud based network infrastructures. Building reliable, high-availability secure networks are critical to the performance of your systems and offer significant opportunity to improve security and reduce operating costs.

First Class Experience
DOWLEY RELATIONSHIP CYCLE

THE DOWLEY RELATIONSHIP CYCLE IS A WELL-DEFINED PROCESS FOR ENGAGING CLIENTS AND TAILORING OUR SERVICES TO MEET YOUR BUSINESS IMPERATIVES. EQUALLY IMPORTANT IS THE DEFINITION OF KEY PERFORMANCE METRICS AND THE CRITERIA BY WHICH SUCCESS WILL BE MEASURED. THROUGH THIS PROCESS WE ARE ABLE TO DELIVER CONSISTENT HIGH QUALITY SERVICES.

Analysis & Assessment

The first step in building any successful and effective security solution begins with a detailed analysis and assessment of the current security needs and potential risks. From administrative changes in common policy to automating security workflows with technology, our team will develop a tailored solution based upon your unique environment.

Definition & Design

The engineering team at Dowley will define requirements and specifications for security solutions based on your business imperatives. From complicated upgrades to large enterprise system deployments or migrations, we are there every step of the way.
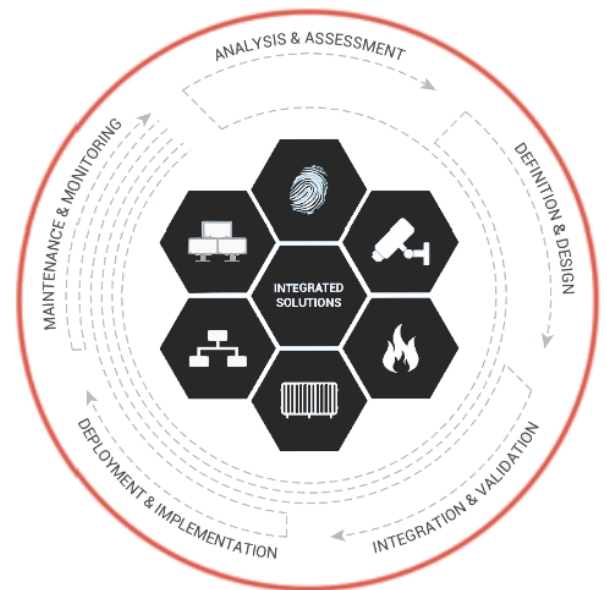

Integration & Validation

Dowley understands the complexities of technology integration and supply chain management. If a system fails during installation at a critical facility, complications may arise. We mitigate this risk by offering complete integration, configuration and testing of systems prior to deployment.

Deployment & Implementation

Dowley will be responsible for the complete system deployment and implementation which includes system design, software configuration, supply and installation of equipment, quality control testing, acceptance training, provision of maintenance, and remote diagnostic services for the system.

Maintenance & Monitoring

Dowley provides a range of post-implementation support services, from contract maintenance to on-call services. Enhance your security visibility further with our Cloud-based video and access control and 7x24x365 system monitoring.

AT DOWLEY WE RECOGNIZE THAT EACH CUSTOMER IS UNIQUE AND NO TWO PROJECTS ARE EXACTLY ALIKE. OUR GOAL IS TO HELP CLIENTS MAINTAIN RELIABILITY OF CRITICAL INFRASTRUCTURE AND PROVIDE MISSION CRITICAL SUSTAINABILITY

SECURITY SYSTEMS

SD&I FAST 50
America's Fastest Growing Security Dealers and Systems Integrators
2017

"The Fast50 gives SD&I a chance to recognize companies on the cutting edge of technologies and service offerings as the standard by which we all can endeavor to achieve. Many of these companies have gone far beyond the usual way of doing things. They are on the forefront of smart technologies for the home and business; they are leaders in combining IT and security into one, cohesive service offering;"

Dowley Security Systems is a full service technology provider specializing in advanced security solutions for critical infrastructure, education, government and commercial markets. Dowley offers a full lifecycle approach to technology in order to best support the unique challenges of our customers including design, implementation, monitoring and maintenance of security systems.

As a leading provider, we take a holistic approach to security that ensures your core business is protected by integrating such technologies as video surveillance, access control, and advanced detection solutions. Dowley integrations combine these technologies with performance-based solutions such as analytics, key performance indicators, and operational workflow solutions in order to give your business visibility and continuity of your critical operations.

Our expertise in designing, engineering and deploying innovative solutions has earned Dowley recognition from prestigious security industry trade magazines and associates. Dowley has been honored with several awards including the 2012 Security Innovation Gold Medal Award, 2012 Top 100 Systems Integrators in the US, and the 2013 Fast50 award naming Dowley as one of America's fastest growing systems integrators.

With Dowley you can be assured that our professionals have the experience,expertise, knowledge and training to identify, address and resolve your security needs.

Headquartered in Houston, Texas Dowley Security Solutions maintains a highly qualified technical staff that specialize in security design, security technology implementation, integration, maintenance and support. .
