

## Managed Detection and Response You Can Trust

Cybercriminals are increasingly able to compromise your environment in minutes and the time between alerts to action is critical for your business. Managed Detection and Response (MDR) solutions allow attacks to be identified in seconds, and contained in minutes on your behalf before they cause a serious business disruption. Threats are proactively hunted across your network, endpoints, cloud and hybrid environments so you can focus on everything else.

### Solving Today's Cybersecurity Challenges

Are you prepared for Cyber Attacks?

Look no further than **Dowley Security Systems**. We hunt, investigate, and respond to threats on your behalf—every minute of every day protecting you from costly disruptions in your business.

Security analysts are available to help out in an emergency situation for your protection. We proactively hunt threats across your network, endpoints, cloud, and hybrid environments so you can focus on growing your business.
